

Programming Fundamentals – Lab 03 Tasks

Objectives of the Lab

- To create and manage a GitHub repository.
- To use basic Markdown formatting in README.md.
- To understand branch creation and version control.
- To write and commit basic C programs.
- To practice input, output, and data types in C.
- To learn precision control and code merging using GitHub.

Task 1: GitHub Repository Setup

Steps:

- Opened GitHub and logged into my account.
- Created a new **public repository** named **PF-Lab-03**.
- Initialized the repository with a **README.md** file and a **License**.

Task 2: README.md Formatting

Muneera6559 Updated README.md using Markdown 38aa3d9 · 5 minutes ago History

C:\> Users\> LENOVO\> Downloads\> README.md > ** # Programming Fundamentals - Lab 03

```
1  # Programming Fundamentals Lab 03
2
3  **Name:** Muneera
4  **Roll Number:** 25K-6559
5
6  ## Lab Objectives
7  - Understand GitHub repository creation
8  - Learn basic Markdown formatting
9  - Practice simple C programming
10
11 ## Tasks Completed
12 - [x] Repository created
13 - [x] README.md updated
14 - [x] C file added
15
```

Steps:

- Opened the README.md file in the repository.
- Added a **Level-1 heading** for the course title.
- Wrote **name and roll number in bold** format.
- Created an **unordered list** for lab objectives.
- Added a **task list with checkboxes** and marked completed tasks.
- Saved and committed the changes.

Task 3: Branch Creation

Steps:

- Created a new branch named with my **roll number** from the main branch.
- Switched to the newly created roll-number branch.

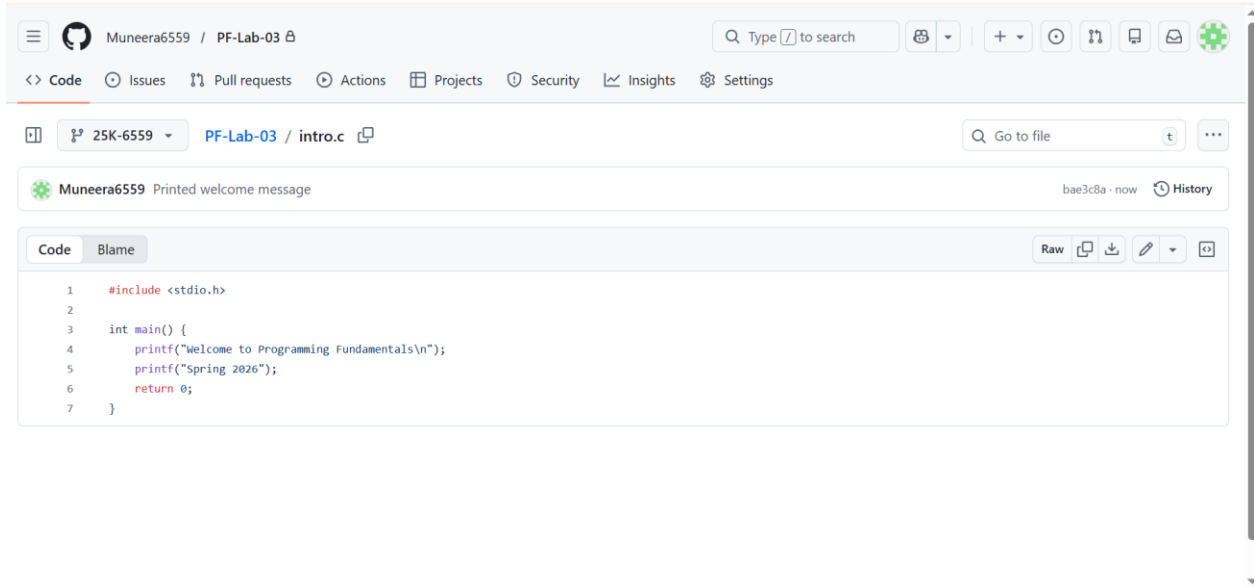

Task 4: Create & Commit a C File

Steps:

- In the roll-number branch, created a new file named **intro.c**.
- Added the **basic C program structure** (main function).

- Committed the file with a meaningful commit message.

Task 5: Basic Output in C

The screenshot shows a GitHub repository for 'Muneera6559 / PF-Lab-03'. The file 'intro.c' is selected, showing a commit with the message 'Muneera6559 Printed welcome message'. The code is as follows:

```
1  #include <stdio.h>
2
3  int main() {
4      printf("Welcome to Programming Fundamentals\n");
5      printf("Spring 2026");
6      return 0;
7  }
```

Steps:

- Edited intro.c to print:
 - *Welcome to Programming Fundamentals*
 - *Spring 2026*
- Saved and committed the changes.

Task 6: Escape Sequences

Muneera6559 / PF-Lab-03

25K-6559 PF-Lab-03 / intro.c

Muneera6559 Used escape sequences for formatted output 021d028 · now History

Code Blame Raw Copy Download Edit

```
1 #include <stdio.h>
2
3 int main() {
4     printf("Name:\tMuneera\n");
5     printf("Roll Number:\tYOUR 25K-6559\n");
6     printf("Section:\tBSCCE-2B\n");
7     return 0;
8 }
```

Steps:

- Updated the C program to print **name, roll number, and section**.
- Used escape sequences `\n` and `\t` for formatting.
- Committed the updated program.

Task 7: Variables and Data types

Muneera6559 / PF-Lab-03

25K-6559 PF-Lab-03 / intro.c

Muneera6559 Added variables and data types dba6893 · now History

Code Blame Raw Copy Download Edit

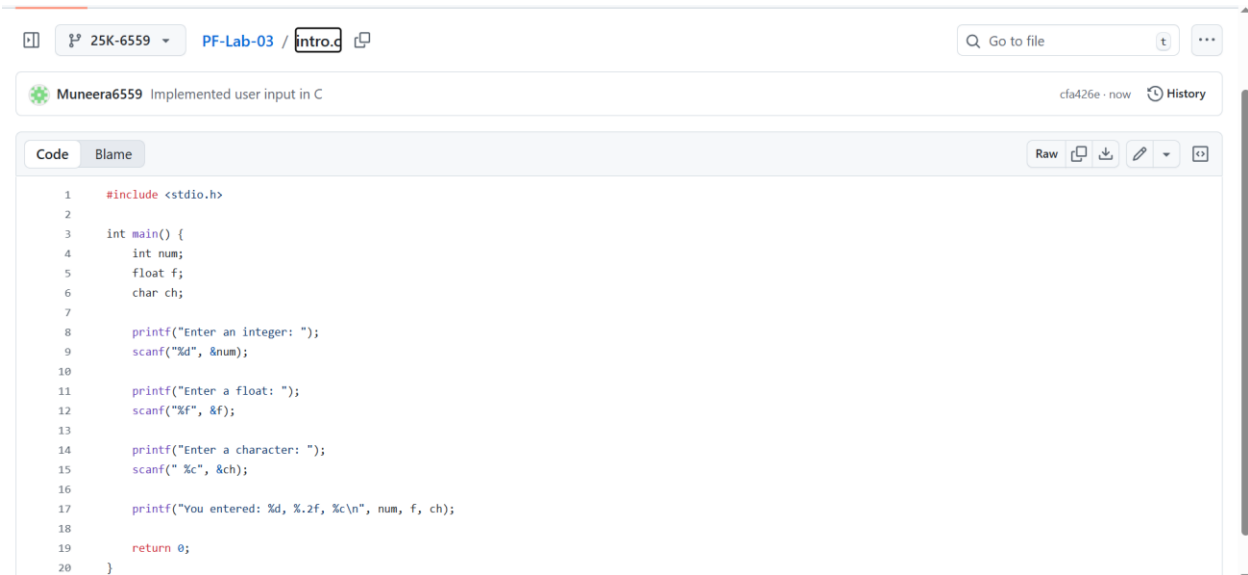

```
1 #include <stdio.h>
2
3 int main() {
4     int age = 18;
5     float marks = 85.5;
6     double cgpa = 3.45;
7     char grade = 'A';
8
9     printf("Age: %d\n", age);
10    printf("Marks: %.2f\n", marks);
11    printf("CGPA: %lf\n", cgpa);
12    printf("Grade: %c\n", grade);
13
14    return 0;
15 }
```

Steps:

- Declared variables of type **int, float, double, and char**.

- Printed all variables using correct **format specifiers**.
- Saved and committed the changes.

Task 8: User Input

The screenshot shows a code editor interface. At the top, there's a header bar with a user profile icon, a dropdown menu showing '25K-6559', a file path 'PF-Lab-03 / intro.c', a search bar with 'Go to file', and a 'History' button. Below the header, a commit message 'Muneera6559 Implemented user input in C' is visible, along with a commit hash 'cfa426e' and a 'now' timestamp. The main area is a code editor with a 'Code' tab selected. The code is a C program that takes integer, float, and character input from the user and prints them back. The code is as follows:

```
1  #include <stdio.h>
2
3  int main() {
4      int num;
5      float f;
6      char ch;
7
8      printf("Enter an integer: ");
9      scanf("%d", &num);
10
11     printf("Enter a float: ");
12     scanf("%f", &f);
13
14     printf("Enter a character: ");
15     scanf(" %c", &ch);
16
17     printf("You entered: %d, %.2f, %c\n", num, f, ch);
18
19     return 0;
20 }
```

Steps:

- Modified the program to take **integer, float, and character input** from the user.
- Displayed the entered values on the screen.
- Committed the changes.

Task 9: Precision Control

The screenshot shows a GitHub repository interface. At the top, the repository name is 'Muneera6559 / PF-Lab-03'. Below the repository name, there are tabs for 'Code', 'Issues', 'Pull requests', 'Actions', 'Projects', 'Security', 'Insights', and 'Settings'. The 'Code' tab is selected. Below the tabs, there is a file path '25K-6559 / PF-Lab-03 / intro.c'. To the right of the file path is a search bar with the text 'Go to file'. Below the file path, there is a commit message 'Muneera6559 Controlled double precision output' and a timestamp '9845811 · now'. Below the commit message, there are two tabs: 'Code' and 'Blame'. The 'Code' tab is selected. Below the tabs, there is a code editor showing the contents of 'intro.c'. The code is a C program that takes a double value as input and prints it with different precision formats.

```
1  #include <stdio.h>
2
3  int main() {
4      double num;
5
6      printf("Enter a double value: ");
7      scanf("%lf", &num);
8
9      printf("Default: %lf\n", num);
10     printf("Two decimals: %.2lf\n", num);
11     printf("Five decimals: %.5lf\n", num);
12
13     return 0;
14 }
```

Steps:

- Took a **double value** as input from the user.
- Printed the value with:
- Default precision
- 2 decimal places
- 5 decimal places
- Saved and committed the program.

Task 10: Pull Request & Merge

Merge roll-number branch into main #1

[Edit](#) [Code](#)

Merged

 Muneera6559 merged 7 commits into `main` from `25K-6559` 1 minute ago

Lock conversation

The screenshot shows a GitHub pull request interface. At the top, a purple banner indicates the pull request is 'Merged'. Below this, a message states: 'Merge roll-number branch into main #1. Muneera6559 merged 7 commits into main from 25K-6559 2 minutes ago'. A 'Delete branch' button is visible. The main section is titled 'Pull request successfully merged and closed' and includes a message: 'You're all set — the 25K-6559 branch can be safely deleted.' Below this is a 'Add a comment' section with a text area and a 'Comment' button. On the right, there is an 'Unsubscribe' button and a 'Lock conversation' button. The footer contains the GitHub logo, copyright information, and various links like Terms, Privacy, Security, Status, Community, Docs, Contact, Manage cookies, and Do not share my personal information.

Steps:

- Created a **pull request** from the roll-number branch to the main branch.
- Successfully **merged** the pull request.
- Deleted the roll-number branch after merging

This assignment has been completed using GitHub.
